

About

I am a dedicated and passionate web developer with a strong foundation in programming, database management, and networking. I specialize in building responsive and user-friendly web applications using modern technologies. I am currently pursuing my **Bachelor of Computer Applications (BCA)** and am actively looking for freelance and full-time opportunities to apply my skills in real-world projects.

Projects

Login Page

- Developed a secure and responsive login page using HTML, CSS, and JavaScript.
- Implemented form validation, error handling, and authentication logic.

Landing Page - Engaging Frontend Design

- Designed and developed an interactive landing page with animations and dynamic content.
- Utilized responsive design to ensure mobile and desktop compatibility.

E-Commerce Page - Online Shopping Platform

- Built a fully functional e-commerce product page
- Implemented product filtering, sorting, and a shopping cart feature.
